

# Metallic<sup>®</sup> DPaaS for hybrid cloud data protection

Hybrid Cloud  
Data Protection

## No-compromise solutions for optimal data backup and recovery

As companies modernize their IT strategies, every journey to the cloud is unique. Companies need flexible, powerful and ultimately secure data protection to meet them where they are today, and help them reach where they want to go tomorrow. With broad support of workloads from on-premises and cloud-native to virtualized environments and containers, plus unique storage flexibility, Metallic DPaaS helps you innovate with peace of mind. Safeguard your data while making the most of your IT resources, reducing data silos, and mitigating the growing risk of ransomware and cyberattack.

## How we are different

- ✓ Award-winning cloud-based data backup from industry-leader Commvault
- ✓ Reduced management overhead, rapid deployment
- ✓ Future-proof scalability, from 1TB to 1,000+
- ✓ Unique hybrid cloud storage flexibility for performance and value
- ✓ Enterprise-grade data protection at hyper-speed
- ✓ Flexible, subscription-based pricing with no capex investment
- ✓ Ultimate, layered security for ransomware protection

Powerful data protection with the simplicity of SaaS. With Metallic you get single-solution protection for critical hybrid cloud data – wherever it lives. Safeguard on-prem, cloud, containers and beyond, for future-proof protection across your entire data estate.
