

5 reasons to choose the AFF A150 system

Budgets are top of mind for organizations like yours as IT leaders try to optimize their infrastructure and minimize costs. The NetApp® AFF A150 system is the optimal solution to meet this challenge.

Powered by NetApp ONTAP® data management software, this system delivers industry-leading efficiency, superior flexibility, and best-in-class data services and cloud integration to help you scale your IT infrastructure, simplify your data management, and reduce storage costs.

Increase performance cost-effectively

The AFF A150 system is a small box with big dreams. This all-flash solution boasts up to a 40% performance improvement over its predecessor.

Scale with ease

The flexibility of the AFF A150 system makes it a versatile solution that you can tailor to meet your needs. This system supports three different drive capacities, 24 internal drives, and up to two expansion shelves.

Future-proof your investment

Take advantage of [NetApp Advance](#), our new storage ownership experience that gives you predictability and adaptability. Make on-premises storage purchases confidently with the option to shift that investment to the cloud in the future.

Reduce TCO

Automatically move your infrequently used data to more cost-efficient object storage—on premises or in the cloud—without having to refactor your applications. This capability optimizes your hardware usage, minimizes your footprint, and significantly reduces your data storage costs.

Simplify cloud connectivity

NetApp storage is natively available on AWS, Microsoft Azure, and Google Cloud, making it incredibly simple for you to migrate workloads and to move data to wherever you need it.
