ClusterLion

Stress less with always-on availability for MetroCluster

MetroCluster is the backbone of many companies, and always-on availability is necessary to ensure productivity and business continuity. ClusterLion for MetroCluster removes the need for complex clusters, shared storage, and other sophisticated infrastructure, reducing cost and complexity.
Key functionalities

Guarantee always-on availability so all storage services remain available 24/7.

Avoid split-brain complications by shutting down the affected site and triggering failover to the unaffected site.

Rely on infrastructure independence to maximize productivity and improve decision-making.

CLUSTERLION
FEATURES

Instant Notifications:

Be alerted via email and a full-feature, secure REST API if a failure occurs.

Switchover:

Ensures automatic switchover on network failure.

Cloud-Based Quorum:

Analyzes and correlates status of both MetroClusters.

Dashboard:

Displays current status and historical event logs.

Avoid downtime & maximize productivity and revenue!

ClusterLion for SAP is a cloud-based quorum that analyses and correlates the status from both sides.
