

City College Norwich

Customer Requirements:

- A highly available and resilient data storage environment was required to replace existing legacy vendor data storage estate.
- All-Flash Storage with DR failover requirements for SAN and NAS data
- Full installation and seamless migration process
- Initial deployment and configuration assistance

Successful Outcome:

- 2 x NetApp A250 NVMe Flash based storage systems supporting SAN, NAS and Object based storage protocols
- At one site a 2U NetApp AFF A250 replaced a rack and a half of legacy infrastructure

Customer Benefits

- VM workload performance increased
- Built-in data protection and immutability using NetApp Snapshots and Replication
- Integration possibilities with the full range of NetApp Cloud Services
